

DISCUSSION QUESTIONS

How will new gas and oil production affect, if at all, America's military and geostrategic role abroad?

1. Will U.S. oil and gas production eventually weaken Russia and Persian Gulf autocracies?
2. Will lower U.S. energy prices lure industries from Europe and Japan?
3. Are there any downsides, at home or abroad, to increasing U.S. oil and gas production?
4. Are the strategic consequences of new U.S. oil and gas production short-term or long-lasting?
