

Tables and Figures

Tables

- 2.1 Daily Food Supplies, c. 1790–1998
- 2.2 Life Expectancy at Birth, in Years, Middle Ages to 1998
- 2.3 Infant Mortality, Middle Ages to 1998
- 2.4 Gross Domestic Product per Capita, A.D. 1–1995
- 2.5 Education, Average Number of Years per Person, c. 1820–1992
- 3.1 EKC Turning Points: Grossman and Krueger Analysis
- 3.2 Consolidated Turning Points: Cole, Rayner, and Bates Estimates
- 5.1 Population Growth and Human Well-Being
- 5.2 Economic Institutions and Human Well-Being
- 5.3 Effects of Changing Population Growth Versus Effects of Changing Economic Institutions
- 5.4 Net Effects of Changes in Population Growth Versus Changes in Economic Institutions
- 5.5 Economic Institutions and Fertility Rates
- 5.6 Economic Institutions and Fertility Rates: Poor Countries

- 5.7 Hypothetical Effects of Modest Institutional Reforms
- 6.1 U.S. Emissions and Sequestrations of Carbon

Figures

- 2.1 Food Supply and Income, 1961–1964
- 2.2 Income and Life Expectancy at Birth, 1962–1997
- 2.3 Infant Mortality and Income, 1962–1997
- 2.4 Postsecondary Education and Income, 1965–1996
- 2.5 Economic Freedom Rankings by Quintiles for 116 Countries
- 2.6 Human Development Index, 1975–1999
- 3.1 Environmental Kuznets Curve
- 6.1 Total Emissions of Carbon Dioxide in the United States, 1900–1999
- 6.2 Total Carbon Emissions per Person in the United States, 1900–1999
- 6.3 Gross Carbon Emissions per Person and Income in the United States, 1929–1996
- 6.4 U.S. Energy Consumption Corrected for GDP
- 6.5 Total Carbon Storage in U.S. Forests
- 6.6 Annual Forest Carbon Sequestration per Person in the United States
- 6.7 U.S. Landfill Storage per Person per Day over Time
- 6.8 Net Carbon Emissions per Person in the United States
- 6.9 Net Carbon Emissions per Real GDP per Person, 1962–1998
- 6.10 World Annual Emissions of Carbon Dioxide per Person
- 6.11 U.S. Gross Carbon Emissions per Person Compared to the Rest of the World
