

## DISCUSSION QUESTIONS

# Weapons: Quantity Versus Quality

1. What do World War II airplanes, tanks, and ships teach us about quantity versus quality?
2. Given zero-sum limitations, should militaries emphasize the production of lots of less expensive weapons rather than fewer weapons of higher quality?
3. Should we be building a 600-ship Navy or keep building a dozen or so \$14 billion aircraft carriers?
4. Do drones now change the age-old equation of quantity versus quality?
5. Will conflicts against different enemies favor quantity versus quality in the types of weapons employed?

## STRATEGIKA

Conflicts Of The Past As Lessons For The Present
