

## DISCUSSION QUESTIONS

Are 20<sup>th</sup>-century-style conventional military assets and strategies still relevant, or are they being replaced by drones, cyberwarfare, counterinsurgency, and satellite technologies?

1. What is the relationship between human nature and the evolution of military strategy and technology?
2. Have nuclear weapons changed war for good, or will there someday be a counter-weapon that ends the protocols of the nuclear age?
3. How long will tanks and aircraft carriers remain vital?
4. Do military revolutions change war or just the appearance of war?
