

## DISCUSSION QUESTIONS

# Space Force

1. Would a space force weaponize existing satellites?
2. Would a space force place military bases on the moon?
3. To what degree, if any, would a space force trigger a new arms race in outer space?
4. Should the United States pursue its own space force or do so in conjunction with its NATO allies?
5. Could a war in space be confined to space or mostly be a way of enhancing war on earth?
