

About the Authors

Alberto Alesina received his Ph.D. in 1986 from Harvard, where he became full professor in 1993. He has written two books and many research papers in the area of economic policy and political economy which have been published in leading academic journals. He is an editor of the *Quarterly Journal of Economics*.

Robert J. Barro is Robert C. Waggoner Professor of Economics at Harvard University, a senior fellow at the Hoover Institution at Stanford University and a columnist for *Business Week*. He has written extensively on macroeconomic topics. Recent research has focused on the determinants of economic growth and the role of dollarization. Recent books include *Determinants of Economic Growth* and *Getting It Right: Markets and Choices in a Free Society*, both from MIT Press.

Eduardo Borensztein is the chief of the Developing Countries Studies Division of the Research Department of the International Monetary Fund, where he has also worked in the Asian and African departments. He received his Ph.D. in economics from the Massachusetts

Institute of Technology (MIT) and an undergraduate degree from the Universidad de Buenos Aires. He has also worked at the Central Bank of Argentina and at FIEL, a private research institute in Buenos Aires. He has published extensively in the areas of comparisons of exchange rate systems, currency crises, financial and foreign exchange markets, and transition economies.

Christian Broda is a Ph.D. student of economics at MIT. His current research looks at the effects of uncertainty under different exchange rate regimes. He also has written about dollarization, optimal regulation in banking sectors with two currencies, and the lender-of-last-resort function of central banks. He was educated at the Universidad de San Andrés in Buenos Aires, Argentina.

Guillermo Calvo is director of the Center for International Economics and Distinguished University Professor, University of Maryland, and will become the chief economist at the Inter-American Development Bank. He was professor of economics at Columbia University and the University of Pennsylvania and senior adviser at the International Monetary Fund. His current research focuses on capital flow volatility and international financial architecture.

Luis Felipe Céspedes is a Ph.D. student at New York University (NYU). Previously, he worked as an economist at the Macroeconomic Advisory Group of Chile's Finance Ministry. His main areas of interest are international finance, macroeconomics, and monetary policy. He will be joining the Research Department at the International Monetary Fund.

Roberto Chang is an associate professor of economics at Rutgers University, New Brunswick, New Jersey. Previously, he was a research officer at the Federal Reserve Bank of Atlanta and an assistant professor at NYU. Professor Chang has published extensively on international economics and macroeconomic policy. His current

About the Authors**xi**

work focuses on financial fragility in emerging markets, exchange rate regimes, and dollarization.

Charles Engel is professor of economics and public affairs at the University of Wisconsin and research associate at the National Bureau of Economic Research. He has held previous appointments at the University of Virginia and the University of Washington. He received his Ph.D. from the University of California. His research is in international macroeconomics.

Stanley Fischer is the first deputy managing director of the International Monetary Fund. Prior to taking up his position at the Fund in 1994, Mr. Fischer was the Killian Professor and the head of the Department of Economics at MIT. He took the B.Sc. (Economics) and M.Sc. (Economics) at the London School of Economics from 1962 to 1966 and obtained his Ph.D. in economics at MIT in 1969. Mr. Fischer is the author of *Macroeconomics* (with Rudi Dornbusch) and of several other books. He has published extensively in professional journals.

Jeffrey Frankel is Harpel Chair at Harvard University's Kennedy School of Government and directs the National Bureau of Economic Research program in International Finance and Macroeconomics. He served as a member of President Clinton's Council of Economic Advisers (1996–99), with responsibility for international economics, macroeconomics, and the environment. Before that, he was professor of economics at the University of California, Berkeley. He has had appointments at the Institute for International Economics, International Monetary Fund, Federal Reserve Board, Brookings Institution, University of Michigan, Yale University, and the World Bank. His Ph.D. is from M.I.T.

Maurice Obstfeld is the Class of 1958 Professor of Economics at the University of California, Berkeley. His interests are in international finance and macroeconomics, areas in which he has published a

number of research articles. Professor Obstfeld received his Ph.D. from MIT, later teaching at Columbia, the University of Pennsylvania, and Harvard before moving to Berkeley. He has served as a consultant for the IMF, World Bank, European Commission, and several central banks. He is a research associate of the National Bureau of Economic Research, a research fellow of the Centre for Economic Policy Research, and a fellow of the Econometric Society.

Carmen M. Reinhart is a professor at the Department of Economics and the School of Public Affairs at the University of Maryland. She is the director of the International Security and Economic Policy Specialization at the School of Public Affairs and a research associate at the National Bureau of Economic Research. She serves on several editorial boards, including those of the *American Economic Review* and the *Journal of International Economics*. She writes on a variety of topics in international finance, including international capital flows, financial crises, and exchange rate programs.

Kenneth Rogoff is a professor of economics at Harvard University. He has formerly held staff positions at the Board of Governors of the Federal Reserve Board and the International Monetary Fund. In 1986, he was a national fellow at the Hoover Institution.

Andrew K. Rose is the Bernard T. Rocca Jr. Professor of International Trade at Haas School of Business at the University of California, Berkeley. His current research has focused on international trade patterns, contagion in currency crises, exchange rate determination, banking and exchange crises in developing countries, and exchange rate regimes. He is the managing editor of the *Journal of International Economics*, a research associate at the National Bureau of Economic Research, and a research fellow of the Center for Economic Policy Research. Rose holds a Ph.D. in economics from MIT and an M.A. in philosophy from the University of Oxford.

Andrés Velasco is Sumitomo-FASID Professor of Finance and De-

About the Authors**xiii**

velopment at the Kennedy School of Government at Harvard University. He has published widely in the areas of international economics, economic development, and political economy. His current research focuses on the causes of financial crises in emerging markets and identifying policies that can help avoid such crises. Velasco holds a Ph.D. in economics from Columbia University and M.A. and B.A. degrees from Yale University. He is affiliated with the National Bureau of Economic Research in Cambridge and the Center for Applied Economics at the University of Chile.

Jeromin Zettelmeyer is an economist in the Developing Country Studies Division of the International Monetary Fund's Research Department. He has also worked in the IMF's European II department. He has a Ph.D. from MIT and an economics degree from the University of Bonn. His publications and research interests are in the areas of monetary policy, exchange rate regimes, international financial architecture, and macroeconomic aspects of transition.
