

# *Figures and Tables*

## FIGURES

|      |  |     |
|------|--|-----|
| 1.1  | The chain of causation   | 4   |
| 2.1  | Average revenue from electricity sales   | 19  |
| 2.2  | Example of CAISO load forecast, actual load,<br>and available generating resources | 46  |
| 2.3  | Operational capacity of California's three investor-<br>owned utilities            | 67  |
| 3.1  | Installed capacity by generation type in the western<br>grid, as of January 2000   | 85  |
| 3.2  | Net generation and utility sales, WSCC states                                      | 89  |
| 3.3  | California energy consumption growth   | 93  |
| 3.4  | Electricity generation supporting electricity use                                  | 95  |
| 3.5  | Electricity imports into California  | 97  |
| 3.6  | In-state electricity generation  | 98  |
| 3.7  | Sources of generation other than natural gas                                       | 99  |
| 3.8  | Gas-fired generation   | 99  |
| 3.9  | Current status of new generating plants  | 102 |
| 3.10 | New plant construction   | 102 |
| 3.11 | Spot wholesale prices  | 110 |
| 3.12 | Peak and off-peak wholesale prices   | 110 |

|      |  |     |
|------|--|-----|
| 3.13 | Price versus quantity for California PX: July 1999                               | 112 |
| 3.14 | Market equilibria without retail price control                                   | 117 |
| 3.15 | Market equilibria with retail price control                                      | 118 |
| 3.16 | Natural gas spot prices in California  | 120 |
| 3.17 | Price versus quantity for California PX:<br>November 2000                        | 131 |
| 4.1  | Spot wholesale prices, California PX   | 148 |
| 4.2  | Spot power prices: various western markets                                       | 150 |
| 4.3  | California electricity futures prices  | 151 |
| 4.4  | Natural gas spot market prices   | 153 |
| 4.5  | DWR electricity purchases  | 156 |
| 4.6  | Average generating capacity off-line   | 158 |
| 4.7  | New electric generation capacity on-line   | 162 |
| 4.8  | Expected new generating capacity in<br>California from plants under construction | 163 |
| 4.9  | Reductions in electricity use  | 165 |
| 4.10 | Electricity system emergency levels  | 167 |
| 4.11 | Energy emergencies and blackouts in California                                   | 170 |
| 4.12 | Residential prices for PG&E  | 205 |
| 5.1  | Total MW under long-term state contracts   | 230 |
| 5.2  | State-negotiated long-term contracts versus expected<br>future wholesale prices  | 232 |
| 5.3  | State financial obligations for long-term contracts                              | 234 |
| 6.1  | PX price and volume during a month   | 257 |

## TABLES

|     |   |     |
|-----|---|-----|
| 2.1 | Retail sellers of electricity in California: 1999                           | 8   |
| 2.2 | Divestiture of IOU-generating assets in California                          | 63  |
| 3.1 | California versus all U.S. residential electricity use                      | 92  |
| 3.2 | Official California forecasts versus actual growth                          | 94  |
| 3.3 | Electricity-generating plants going on-line after restructuring             | 104 |
| 3.4 | Electricity-generating plants, approved after restructuring,<br>not on-line | 106 |
| 4.1 | Rolling blackouts in California   | 171 |
| 4.2 | State costs for electricity purchases                                       | 183 |
